CAREER OBJECTIVE

Passionate Frontend Developer with hands-on experience building responsive, user-focused web applications using React.js, Tailwind CSS, and Node.js. I specialize in creating scalable interfaces that blend design and functionality while collaborating across teams to deliver modern, impactful software.

EXPERIENCE

Frontend Developer (Freelance)
Remote | *2023 – present*

- Developed and deployed several modern web apps using **React.js, Tailwind CSS, and JavaScript.**
- Built scalable UI components and optimized performance for real-world use cases.
- Collaborated with developers on GitHub and managed code contributions using Git version control.

Backend Developer Intern (Venix Partners)
Remote | *Aug 2025*

- Currently contributing as a **Backend Intern**, building and maintaining APIs with **Node.js, Express.js**, and **MongoDB**.
- Collaborating with the frontend team to integrate and test endpoints for live projects, ensuring seamless user experience.
- Assisting in improving database performance and optimizing data flow between frontend and backend.

EDUCATION

Federal University of Technology, Minna
B.Tech Eng Mechatronics Engineering
2023 – 2028

SKILL
Frontend: HTML5, CSS3, JavaScript (ES6+),

React.js, Tailwind CSS, Bootstrap

Backend: **Node.js, Express.js, PHP, REST APIs**

Database: **MySQL, MongoDB**

Tools: **Git, GitHub, Postman, VS Code, Figma, Vercel, Netlify**

PROJECTS

Unifyr - Demo | Source
Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB

A unified web platform designed for businesses offering multiple services—such as printing, food, real estate, and recruitment—allowing them to manage everything from one digital hub. Features include service category pages, contact forms, and a scalable backend API for managing all branches under one dashboard.

WonderTix - Demo | Source
Stack: React.js, Tailwind CSS, Local Storage

A sleek event ticketing app that allows users to explore upcoming shows, view event details, and book tickets digitally. Includes seat selection, payment integration, and booking history management.

Cara E-Commerce- Demo | Source
Stack: HTML5, CSS, Local Storage
A modern, minimal e-commerce site where users can browse, filter, and add products to cart.

Hotel Management System - Demo | Source
Stack: Node.js, MongoDB, and Express.js
A complete backend-driven hotel management system that handles room bookings, customer data, and admin dashboards. Includes APIs for managing rooms, availability, and payments.
