PROFESSIONAL SUMMARY

Fullstack Developer with hands-on experience building and deploying production-grade web applications using the **MERN** stack. Proven ability to architect REST APIs with JWT authentication, integrate third-party payment systems, and ship responsive frontends. Currently completing Industrial Training (IT) as part of a B.Tech in Mechatronics Engineering at FUTMINNA, with a unique background bridging web development and embedded systems.

EXPERIENCE

Fullstack Developer Intern: Venix Partners Limited | Remote | Aug 2025 – Feb 2026

- Built **WonderTix**, a production ticketing platform for Festive Wonderland 2024 (Nigeria), handling ticket purchasing and payment processing via Alat by Wema Bank integration
- Developed frontend interfaces and Supabase backend integration for **Turnaj**, a sports application, including waitlist and user management systems
- Contributed frontend work on **BingeBay**, a large-scale video streaming platform (Netflix-style), collaborating across a multi-developer team using Git and GitHub
- Integrated REST APIs across frontend and backend services, ensuring seamless data flow and consistent user experience across multiple live projects

Independent Developer: 2023 – Present

- Designed, built, and deployed multiple fullstack and frontend projects independently, spanning MERN stack applications, REST APIs, and hardware-integrated dashboards
- Consistently practiced component-based architecture, version control with Git, and deployment via Vercel and Netlify

PROJECTS

Unifyr: React, Node.js, Express.js, MongoDB | **Demo:** unifyr-sigma.vercel.app

- Built and deployed a production-ready fullstack business management platform with JWT authentication, session handling, and 16 REST API endpoints across admin, auth, and order management modules
- Architected a unified dashboard enabling businesses to manage multiple service branches (printing, food, real estate, recruitment) from a single interface
- Fully deployed: React frontend on Vercel, Node/Express/MongoDB backend on live server

CyGen Dashboard: React, Tailwind CSS, ESP8266 | **Demo:** cygen13.vercel.app

- Built a real-time IoT telemetry dashboard for an ESP8266-based hardware project, displaying live sensor data including battery level, RPM, speed, voltage, and power flow
- Demonstrates cross-disciplinary application of Mechatronics and web development skills; one of few junior web developers with hardware-integrated project experience

Hotel Management API: Node.js, Express.js, MongoDB | **Demo:** hotel-management-1-3i2q.onrender.com

- Designed and built a backend RESTful API handling user authentication, room management, availability tracking, and booking management with full CRUD operations

SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, NestJS, PHP, REST APIs, JWT Authentication, Supabase

Database: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, Postman, VS Code, Figma, Vercel, Netlify

EDUCATION

Federal University of Technology, Minna (FUTMINNA) | 2023 – 2027
